Awaken our robots!

We're a robotic startup located in Munich, Germany, which develops and produces a perception driven logistics robot. Our robots are deployed in several warehouses and solve real customer problems. With over 75 employees we're one of the biggest Advanced-Robotics-Teams in Europe.

Your Responsibilities

- Deployment of our robots to our customer's warehouses
- Analysis, benchmarking and troubleshooting of complex and fascinating robotic problems at our customer's facilities
- Close collaboration with our developers in the head office
- Analysis of requirements and training of our customers
- High willingness to travel (about 80% of the time), currently mostly inside Germany

Your Profile

- Bachelor or Master in robotics, IT, mechatronics or similar
- Experience with robotic and/or embedded software development (e.g. during your studies)
- Knowledge of ROS (Robot Operating System), Linux, C++ and/or Python
- Basic understanding of mechanics, electrical systems, networks, IT and basic Linux administration
- Excellent customer relationship and organizational talent
- Fluent English required, German helpful!
- Valid driver's license

What we can offer you

- A future-oriented job in a quickly growing startup
- High personal responsibility & room to maneuver
- An attractive salary, company car, cellphone and other benefits
- Young, innovative team with flat hierarchies
- 100% startup atmosphere and regular team events

You love robotics and would like to be on board to design, form and create a great idea right from the beginning? We'd be more than happy to receive your CV at jobs@magazino.eu or call us at +49-89-21552415-7.
