Join ABB and work in a team that is dedicated to creating a future where innovative digital technologies allow greater access to cleaner energy.

Are you ready to apply your theoretical knowledge in real projects in a digital pioneer organization? Do you want to explore the fantastic products of ABB Turbocharging in Switzerland and abroad?

Then our Graduate Digital Trainee Program Turbocharging could be the right fit for you. Our trainee program is a unique entry opportunity to begin your career with ABB Turbocharging.

ABB Turbocharging (www.abb.com/turbocharging) is at the helm of the global industry in the manufacture and maintenance of turbochargers for 500kW to 80+ MW diesel and gas engines. Our leading-edge technology and innovation enable our customers to perform better and produce fewer emissions, even in the toughest terrains.

Start date of the program is October 1, 2020. The position will be open for applications until May 3, 2020. Video interviews will be hold beginning/mid of May 2020 and you will be informed latest by end of May if you are invited to the assessment center. The Assessment Center will be on June 23, 2020. The in-person one-day assessment center is required in order to be selected, so please tentatively hold the date. Thank you for your interest in ABB and our Digital Trainee Program Turbocharging!

Your responsibilities

Experience the operations of an international company first hand during three different six months assignments over the course of 18 months, one of them abroad and one of them in a digital related environment.

Explore your interests through challenging and impactful assignments where you are fully integrated into the team.

Profit from individually targeted possibilities for training and development, professional mentoring, exposure to executives, and support from the Trainee Program team.

Actively contribute to diverse social events and team activities and use the chance to establish a broad network within ABB and ABB Turbocharging.

Develop your strengths with the help of regular feedback on your performance and clearly established performance objectives.
Typical assignments include digital, sales, project management, operations, lean manufacturing, supply chain, service, and many more.

Your background

Graduates (Bachelor and/or Master) from university or applied science university in mechanical engineering, machine technology, industrial engineering, or a related discipline with strong ability to digitalization
Experience in business/economics related courses is a plus
Completed university studies before the start date October 01, 2020
Less than two years of professional work experience by the start date October 01, 2020
Excellent knowledge of English; fluency or proficiency in other languages is a plus, especially German, Italian and French
Authorization to work in Switzerland is strongly preferred (B permit)
Beyond these requirements and preferences, we strongly value other skills including:
  • Analytical and target-oriented thinking and acting
  • Determined and solution-focused personality
  • Inquisitive, open-minded, and communicative team player with excellent ability to collaborate
  • Strong self-initiative and self-awareness
  • Highly adaptable and flexible to different styles, situations, and cultures
  • Innovative and creative mindset
